

Technical Data Sheet

Product: Stegobium lure

Code: PH-847-1RR

Product Function: Monitoring

Description: This product is a pheromone lure for the biscuit beetle

Latin Name: *Stegobium paniceum*

Active Ingredients: Serricornin and wheatgerm attractant

Longevity: 4 - 6 weeks

Dispenser: Rubber septa with cotton filter

Packaging: Airtight metalized sachet

Trap Application:

Remove the lure from the packaging and place in the center of the trap. Place the traps on the floor near problem areas.

When to Use:

Use before the emergence of the first generation and until the end of the season.

Trap Density:

Each lure covers 100m², however more traps can be used to pinpoint infestations.

Replacement:

Replace the lure every 4 - 6 weeks or as recommended by the local agricultural authorities. Remove old dispensers and dispose of away from the monitoring area.

Suitable Traps:

The most suitable trap for this insect is the Safestore easyread pitfall trap.

Store in a cool, dry place out of direct sunlight.

- When stored in a cold room of 10-20°C, this product will last 6 months.
- When stored in a refrigerator at 4-9°C, this product will last 12 months.
- When stored in a freezer at -18°C, this product will remain effective for 24+ months.

Precautions

- Handle carefully, avoid extensive contact by hand and wear gloves when handling.
- Do not eat or drink while handling this product.
